

ABSTRACT

Disclosed is a system and method for transmitting AV/C data over one or more transports. Further disclosed is a system and method for transmitting AV/C data over non-FCP communication media. The disclosed system and method includes an AV/C

5 transaction delivery system which operates in conjunction with communicatively coupled AV/C protocol layers, AV/C transport layers, and AV/C transport controllers to effectuate transmission of AV/C transaction data without regard to protocol.
